NORDIC CLIP

HIGH PERFORMANCE ROOF SYSTEMS

High performance **NORDIC CLIP** roof is universal. It can now be found virtually anywhere from mansards, to low slope roofs on large factories. Most importantly, **NORDIC CLIP** roofs have the proven durability and quality necessary for schools and public buildings.

NORDIC CLIP panels are precision roll formed to exacting standards with the most up-to-date roll forming equipment.

Roof Panels Description: Ribbed pattern, with 8 inch spacing
Rib height 1 5/8", panels 16" coverage
Panel is a 24 gauge
Nordic Clip can be cut to 50 ft. lengths
Longer lengths may be provided if transportation and site handling facilities permit.

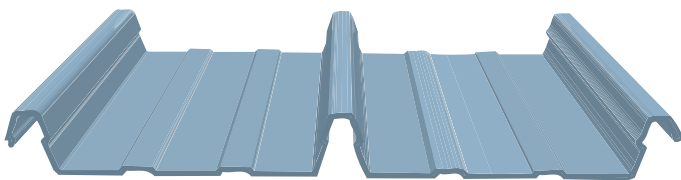

Clip Description: Made from 22 gauge galvanized steel

LIVE LOADS

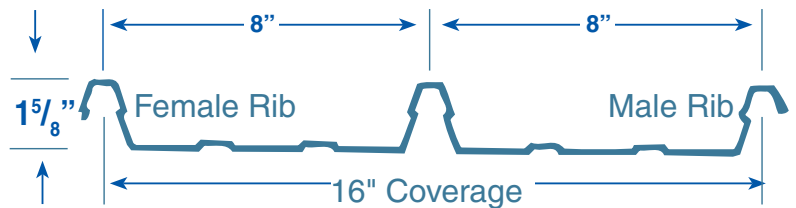

Span Condition	MAXIMUM ALLOWABLE UNIFORM LOADS IN PSF									
	GA	4'-0"	4'-6"	5'-0"	5'-6"	6'-0"	6'-6"	7'-0"	7'-6"	8'-0"
Simple Span	24	132	93	68	51	39	31	25	20	-
2 Spans	24	125	98	80	66	55	47	41	35	31
3 or more Spans	24	145	115	93	77	65	55	47	40	33

Above loads are limited by stress and meet or exceed deflection ratio of L/240 of span.

The roof system meets Air Tightness in accordance with ASTM E-283, for Water Tightness in accordance with ASTM E-331 and for Wind Uplift in accordance with UL 90.

NORDIC CLIP PANEL

FOR ARCHITECTS & DESIGNERS

WESTFORM metal roofs have:

- A vast spectrum of design opportunities for steep and low slopes, mansards, dormers, valleys and more elaborate roof profiles
- Low life-cycle costs
- Broad selection of colours
- Fire resistant
- High quality material and enhanced appearance in one product
