The "DEUCE" can be adhesive or mechanically fastened and requires a 1.5" flat mounting area. They will fit most popular 36" panels with three 12" flats or four 9" flats without rib straddling! The waffled base provides almost triple the bonding power of a smooth bottom guard in this size category. Starter points are provided for mechanically fastening. Available in a variety of stock colors. Professional ATI test results show the SnoBlox Deuce held up to 3456 pounds when screw mounted and 1379 pounds when adhesive mounted using the SB-190. All tests were performed simulating realistic snow loading conditions applied to the face of the guard.

Placement in just isolated areas such as chimneys, doorways, vents and partial roof sections is NOT recommended.
